# Contents

## Papers

1 **The iron and steel industry in Brazil** F. Lanna Leal and B. Torres

17 **The future of engineering steels** D. J. Naylor

26 **Thermal degradation of coke during rapid heating** Y. Iwanaga

31 **Consolidation of approaches for bubbling–jetting transition of gas jets in liquids** S. C. Koria

38 **Inoculation during electroslag remelting of 15CDV6 high strength steel** M. Chatterjee, M. S. N. Balasubramanian, K. M. Gupt, and P. Krishna Rao

43 **Continuous casting refractories for improved operating and quality performance** N. A. McPherson, S. J. Lee, G. J. Roberts, and J. Purdie

46 **Developments in computer assisted steelmaking at British Steel Clydesdale Works** M. Copeland, D. Engledow, K. Mackenzie, and J. Powell

53 **Process and plant design technologies for successful hot connection** R. A. Carr, E. C. Hewitt, and J. H. Watters

69 **Thirty years of the Italian steel industry** A. Moll

83 **Scrap – a raw material in worldwide demand for steelmaking** R. Berlekamp

89 **Recomputerisation of hot strip mill at Ravenscraig** I. Harris and T. Black

93 **Kinetics of gasification of coal char with $CO_2$ in a rotary reactor** S. P. Mehrotra and J. K. Brimacombe

105 **Determination of stable operating conditions for sintering of Itakpe iron ore concentrates** S. I. Okeke, O. O. Olubajo, and I. C. Ifezue

110 **Choice of process route in steelmaking** J. Aylen

118 **Development of electrode consumption at Hadeed** H. Jung, R. S. Armstead, N. Al Ibrahim, and B. Bowman

123 **Effects on furnace arcs of submerging in slag** B. Bowman

130 **Control of segregation in continuously cast slabs for high quality plate applications at British Steel, Ravenscraig Works** J. E. Haggart, A. W. Hardie, and D. W. Bruce

135 **Automation of hot blast stove operation at Sidmar: control and optimisation of energy consumption** J. Derycke, R. Bekaert, P. Cousein, L. Bonte, and H. Bruneel

139 **Model of deformation and heat transfer in hot rolling of bars and sections** I. P. Kemp

149 **The steel industry in India** A. Chatterjee

162 **Development and production of work and backup rolls** L. M. Collins and H. T. Gisbourne

167 **Phase transformations during oxidising roasting of titanomagnetite pellets in vanadium recovery process** T. Bołd and R. Kuziak

179 **Kinetics of decarburisation of iron–carbon melts** J. Ahmad and C. Bodsworth

184 **Phenomena occurring during drainage of metallurgical vessels: Effect of stopper rod on vortex formation and development of surface waves** M. Dubke and K. Schwerdtfeger

193 **Chaparral Steel: 15 years of innovative steelmaking** R. E. Lincoln, P. B. Wilson, and H. D. Hunt

197 **On line quality control for continuously cast semis** W. R. Irving

203 **Effect of bright drawing on machinability of free cutting steels** M. L. Pickett and D. J. Naylor

213 **Statistical modelling** G. Tunnicliffe-Wilson

236 **The modern car – what chance for steel?** D. Kewley

245 **Developments in modelling and simulation of iron ore sintering** M. J. Cumming and J. A. Thurby

255 **Viscosities of liquid silicates** G. Urbain and M. Boiret

261 **Rate of nitrogen absorption in molten iron–chromium alloys: Part 1 Experimental** W. D. Cho and Y. K. Rao

273 **Rate of nitrogen absorption in molten iron–chromium alloys: Part 2 Mathematical model** Y. K. Rao and W. D. Cho

282 **Design criteria for the modern UHP electric arc furnace with auxiliaries** K. Bergman and B. Gottardi

288 **Commissioning and work up to three strand round bloom caster of British Steel Clydesdale Works** A. Byrne, J. Powell, A. Perkins, and N. Hunter

317 **Effect of chemical composition of iron oxides on their rates of reduction: Part 2 Effect of trivalent metal oxides** U. F. Chinje and J. H. E. Jeffes

325 **Model study of mixing condition in combined blow steelmaking bath** S. C. Koria and S. Pal

333 **Cold model study of liquid–liquid mass transfer in combined blowing BOS converter** R. P. Singh and D. N. Ghosh

343 **Developments and applications of alloy and stainless steels with improved machinability** I. G. Davies, N. A. Finch, and M. L. Pickett

350 **Developing plasma applications for metal production in the USA** J. E. Goodwill

355 **Condition monitoring – its impact on plant performance at British Steel, Scunthorpe Works** L. Green

363 **Bloom mill process model** L. D. McKewen and G. Glover

379 **User needs in the steel construction industry** J. C. Taylor

381 **Effects of dimensional and shape deviation of steel products on automotive processing operations** G. M. Davies

384 **Development in ASW** A. R. Franks

389 **Silica reduction in a blast furnace** N. K. Batra and P. S. Bhaduri

394 **Development of hybrid gas sampling probe and its application to actual blast furnace operation** C. Yamagata, T. Yamamoto, Y. Kajiwara, T. Inada, S. Ohara, and Y. Nakamura

401 **Simulation of mass transfer from metal to slag in gas stirred ladles** S. C. Koria and M. R. R. I. Shamsi

410 **Optical basicity of fluoride containing slags** J. A. Duffy

414 **Effect of pulsating stirring of liquid core on solidification of large steel ingots** Lj. Nedeljković, V. L. Pilyushenko, and A. N. Smirnov

424 **Segregation of carbon and manganese in continuously cast high carbon steel for wire rod** P. K. Sung, D. R. Poirier, P. Yalamanchili, and G. H. Geiger

431 **Operating results from complex steelmaking route and scheduling control system developed to optimise production at Teesside Works, British Steel** J. Neesam, D. Morris, D. Hogg, and D. V. Barradell

438 **Process control models for real time applications** I. F. Taylor, G. J. Thornton, and R. J. Batterham

443 **Technical note: Modelling of mixing in steelmaking processes** R. P. Singh and D. N. Ghosh

---

## News from Industry

**pages 1, 69, 149, 221, 297, and 373**

## Book reviews

**pages 15, 144, and 292**

## Translations

**pages 65, 146, 218, 294, 368, and 445**
